Description
Helpful

Professor Allison truly exceeded my expectations for this course. He knows object
oriented programming very well and can explain it clearly. If I didn't understand a concept he

would present it to me in a different way and work with me until I understood the concept. I felt comfortable approaching Professor Allison in his office to ask about a project, lecture or how I was doing in his class. Professor Allison has been extremely helpful even outside of class. Most students (including me) will do their projects over the weekend. Professor Allison is available to us over the weekends when we need the most help. I appreciated that Professor Allison knew how I was doing in his class without needing to refer to a spreadsheet. I imagine he was equally aware of other students throughout the semester. To sum up my experience with Professor Allison he has been the best instructor I have ever had.

- great teacher, explained material really really well he is in my opinion a A+ teacher

- it helped me understand the first half of the class

Suggestions

- The only problem I had with this course was blackboard. Sometimes while submitting an assignment, my browser would close without warning and without telling me why it closed. That can be stressful.

- don't go off of debrys slides

- nothing he already does great!
