Description

Helpful

 Chuck is one of the best UVU CS teachers. He makes the class interesting with his
passion for the material. I'm impressed with how much I have been able to learn from him in

such a short time.

Chuck is the best instructor I've had at this school.

Chuck is the man! One of the best teachers I have ever had, its a shame I only got him in a couple of the end classes, but I am fortunate to have him for the senior level classes. He is one of the most organized teachers I've ever had and is always incredibly knowledgable about the topic he is covering.

Fun teacher

See my email - Steve

Very knowledgeable and will exhaustively answer questions to make sure students understand what he's teaching. Doesn't treat any questions as dumb. Fair tests.

Suggestions

Class was not organized. Syllabus, Homework problems, Slides were constantly changed, making often possible to miss assignments that were added shortly before the due date. Teacher did not want students to perform well in his class and complained about to high grades, and also always added more material trying to fail students. Class may as well be renamed to analysis of ML. ML was uninteresting and not useful to study. I suggest to talk about ML for a week and expand Python lectures to be more than reading the reference manual for the last 2 weeks of the semester. The ML book was boring to read and not helpful at all. The presentations and writing the paper were unnecessary and useless. Quizzes that take 15+ or even 30+ minutes are no longer called quizzes but tests. Probably the most useless class I have taken in the past 4 years. Cannot recommend the teacher either.

More Python.

More python but I am biased.

More time for python, it felt a bit crammed in at the end.

See my email - Steve

The only problem is that he doesn't teach enough courses. And the projector filter needs to be cleaned.
