Description

Helpful

His knowledge about the subject (c++) is superb! His examples that he'd give to help us
out on program homework were excellent. and he'd give us tips and tricks that only a
master would know.

I have a better understanding not only of C++, but general programing practices and the underlying environment... Oh and Algorithims rock

Knows his stuff COLD. Helps learning C++ from somebody that actually understands it. Very good instructor, would buy again, AAA+++ ;)

Suggestions

Keep teaching C++. Just sayin'. You're one of the better instructors that I've had.

Pay him more money, He's worth it. that's the improvement needed.

The program specs where confusing at times as to what was expected or how they where to be completed. But not confusing enough to prevent me from completing them, just enough that I had to get clarification on them.
