Hi Chuck--Can you pour your thoughts about the book into the format of the questionnaire?
You did so for the first chapter. I know it seems to redundant to do so for each chapter, but it
is an organizing diagnostic tool. Your additional observations have been great. There is also
a summary portion that would be great to see your respnse.

Your interest in writing an automata textbook was noted, and I am interested in finding out more.

Thanks for participation in the review process.

Best wishes, Jim
